

Advanced (Level III) – Q12

There are three candidates in the election for the President of the Students' Union. Write a voting program that meets the following requirements:

- the program shows a list of candidates at the beginning;
- inputting the number of a candidate means casting a vote on the chosen candidate;
- if the input is invalid, an error message should be printed;
- inputting -1 means finish voting, then the program shows the number of votes received by each candidate and the elected candidate;
- if more than one candidate gets the highest number of votes, the election is void and "There are candidates with the same votes" is displayed.

The following is the output of this program and the text in bold represents the user input:

```
List of the candidates for the president of the Student Union:
1 = Dickson
2 = Emma
3 = Jayden
Which candidate would you vote for? 1
Which candidate would you vote for? 2
Which candidate would you vote for? 1
Which candidate would you vote for? 3
Which candidate would you vote for? 32
Invalid
Which candidate would you vote for? 3
Which candidate would you vote for? 3
Which candidate would you vote for? 2
Which candidate would you vote for? 3
Which candidate would you vote for? 1
Which candidate would you vote for? 3
Which candidate would you vote for? -1
The election result:
Dickson: 3
Emma: 2
Jayden: 5
Jayden is the new president of the Student Union
```
